

Radiation Protection Training Objectives

Part 1: History of the NRC's regulatory activities in the area of radiation protection.

Part 2: Describe the responsibilities of the licensing professional during NRC inspections using IP 71124 and attachments.

Part 3: Discuss the regulatory requirements pertaining to source material, by-product material, and special nuclear material.

Certrec Academy training eclipses the current "death by Power Point" training model by engaging the learner with videos, slides, thought provoking Q & A, links to references, and mentorship.

*The material is concise with informative videos sprinkled in that helps maintain your attention.
For future training, I would definitely choose CA again.
